

## ACID SANITIZER

ACID SANITIZER is a low foaming economical sanitizer, recommended for use in the Dairy, Food and Beverage Industries.

### BENEFITS:

- Low foaming
- Effective in ambient water solutions.
- Combines acid rinse and sanitizing in one step
- Safe on most metal surfaces when used as directed.

### PHYSICAL & CHEMICAL PROPERTIES:

Appearance:	Clear, straw liquid
SG:	1.15
pH (Concentrate):	1.4

### USE

#### DIRECTIONS:

ACID SANITIZER can be automatically fed from the shipping container into tanks or lines using liquid injectors, air operated pumps or electric pumps. Adjust feed such that dilution pH is 2.0 to 2.1 (1.5 to 2.0%).

#### PRECAUTIONS:

**CORROSIVE.** Avoid eye and skin contact. Avoid breathing mist or spray. Wear protective equipment when handling.

#### PACKAGING:

4X4L, 20L
