

## CHAIN LUBE

Highly Chelated Conveyor Lubricant and Cleaner

Provides excellent lubrication in hard or soft water. Reduces friction on motors and contact parts in the conveyor system and keeps chains and belts clean. Formulated for use in bottling operations, breweries, meat packaging and other food processing and ware washing industries.

PROPERTIES:      Appearance: clear straw to light amber liquid  
                         pH (conc): 9 – 10  
                         SG: 1.04

### GENERAL USE

DILUTIONS:      Depending on lubrication needed, add 5 to 20 mL per litre of water and spray on to surfaces to be lubricated and cleaned using automatic pressure spray equipment.

PRECAUTIONS:    Avoid eye and skin contact.  
                         See Material and Safety Data Sheet before using.

PACKAGING:      20L    pail  
                         55L    drum  
                         205L  drum

DATE:              March 1995.
