

FINAL RINSE

DIN # 02338475

FINAL RINSE is a versatile disinfectant / sanitizer that can be used in a variety of applications.

Hospital Disinfectant
General Disinfectant
No Rinse Sanitizer

Deodorizer
Mildewstat

FINAL RINSE is a disinfectant and sanitizer for use in hospitals, food processing plants, dairies, restaurants, bars, animal quarters, kennels, and institutions where disinfection, sanitization and deodorization are of prime importance. FINAL RINSE is formulated to disinfect pre-cleaned, inanimate hard surfaces such as walls, floors, sink tops, tables, chairs, telephones and bed frames.

FINAL RINSE deodorizes those areas that are generally hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, pet areas and other areas prone to odors caused by microorganisms. FINAL RINSE controls mold and mildew and the odors they cause on hard, non-porous, inanimate surfaces.

FINAL RINSE is also an effective bactericide in the presence of organic soil (5% blood serum).

PHYSICAL & CHEMICAL PROPERTIES:

Appearance:	red liquid
pH (as is):	6 - 8
Specific Gravity:	0.99
Quat Content:	3%

DISINFECTION: To disinfect pre-cleaned inanimate, hard surfaces apply FINAL RINSE solution with a mop, cloth, sponge or coarse spray so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes then remove excess liquid. Prepare a fresh solution for each use. Surfaces that come into contact with food must be thoroughly rinsed with potable water after disinfection.

BACTERICIDAL ACTIVITY:

When used as directed at 73 millilitres per 4 litres, FINAL RINSE exhibits effective disinfectant activity against the organisms:

Staphylococcus aureus	ATCC#6358
Salmonella choleraesuis	ATCC#10708
Listeria monocytogenes	ATCC#35152
Yersinia enterocolitica	ATCC#23715
Escherichia coli	ATCC#1122
E.coli 0157:H7	ATCC#15442

HOSPITAL DISINFECTION:

When used as directed at 73 millilitres per 4 litres of water on environmental, inanimate non-porous surfaces, FINAL RINSE exhibits effective disinfection against Staphylococcus aureus, Salmonella choleraesuis, Listeria monocytogenes, E.Coli:0157:H7, Pseudomonas aeruginosa, Vancomycin intermediate resistant Staphylococcus aureus (VISA) and Methicillin resistant Staphylococcus aureus (MRSA). For disinfection against Human immunodeficiency Virus Type 1 (HIV-1) use at 108 ml per 4 L of water. Follow instructions on label. Food contact surfaces require a rinse with potable water after disinfection.

SANITIZATION:

FINAL RINSE can be used at 54 millilitres per 4 litres of water (400 ppm active Quat) to sanitize pre-cleaned, non-porous food contact surfaces without a potable water rinse. For sanitizing processing equipment, conveyors, tables in food plants simply spray on at a range of 370-400 ppm and keep wet for 60 seconds. Let air dry. No rinsing is required.

PRECAUTIONS AND HANDLING:

Keep out of reach of children. Avoid eye and skin contact. Avoid ingesting. Refer to label for usage instructions.

PACKAGING:

- 4X4L
- 20L
- 205 L
