

DESCALER LFP

Concentrated hard water descaler made from low pH organic salts, no traditional acids. Ideal for descaling stainless steel or glass jacketed equipment. Replacement for traditional acids in CIP systems for removal of milk and beer stones. Also used for dishwashers, counters, steam tables and coffee machines. Ideal for removal of rust on metal surfaces.

BENEFITS:

- 100% soluble in water
- No fumes
- No phosphates

USE:

- Dilutions: For heavy scale build up DESCALER LFP can be used up to 100%.
- For closed loop systems use between 1 & 7% depending on calcium load
- For general use: coffee maker, dishwasher use DESCALER LFP at a ratio of 2 – 8 parts water to 1 part DESCALER LFP.

PRECAUTIONS:

- CORROSIVE. Avoid skin and eye contact.

PACKAGING:

- 4x4L Case
