

## **ENERGEE**

Alkaline chlorinated automatic dish detergent for use in commercial dishwashers. ENERGEE is a heavy duty encapsulated mechanical dishware washing compound specifically formulated for use in high soil loads, and moderate hard water. Designed for use in a power activated/automatic feed detergent dispenser.

### **PHYSICAL AND CHEMICAL PROPERTIES:**

- Free flowing
- Appearance: white powder
- Characteristic odour
- In capsules it is used with automatic metering systems in automatic flight washers or rack machines.
- High chelation makes this product appropriate for moderately hard water and provides very low costs with excellent cleaning and destaining.

### **PRECAUTIONS:**

- Contains sodium hydroxide. Must not be allowed to contact skin and eyes.

### **PACKAGING:**

- 40 lb. pails
- 4 X 4 kg capsules
