

GREASE EATER

A powder, high alkaline multipurpose degreaser and high strength cleaner.

USE:

- **Grill Cleaning:** Dissolve 2 tablespoons in ½ litre of warm water. Apply to grill and wipe off with clean warm water
- **Overhead Hoods:** Slowly dissolve 5 tablespoons in ½ litre of warm water. Pour solution through the filters and rinse with hot water.
- **Grease traps and drains:** Slowly dissolve 5 tablespoons in ½ litre of warm water. Flush through grease trap or down drain at end of day.
- **Fryer Cleaner:** Drain all oil and fill fryer with hot water. Add 100 to 200 grams of Grease eater to water. Turn on fryer and bring to a boil for 20 minutes or until clean. Drain and rinse with clean water. On fryers with high amounts of baked carbon a second treatment may be necessary.
- **Floors:** Sprinkle a small amount of Grease eater directly on floor and mop with a wet mop. Rinse thoroughly with clean water. Grease eater may also be added to a mop bucket for a wet mop application. Add 3 tablespoons of Grease Eater to every 4 litres of water in the mop bucket. Mop as usual and rinse thoroughly with clean water.

PRECAUTIONS:

- Contains caustic. Wear appropriate protective gear and read MSDS before using.

PACKAGING:

- 3 kg Pail
