

ENZYME DETERGENT NP

Low temperature, one-shot, enzyme activated laundry detergent with safe oxygen bleach. Super concentrated and fortified to remove soils and stains rapidly and effectively.

BENEFITS:

- Super results at temperatures as low as 120°F (49°C).
- Contains no phosphate.
- Contains an oxygen bleach that releases hydrogen peroxide – not chlorine.
- Facilitates removal of proteinaceous stains such as blood, grass, milk, eggs, soya, and stains from starchy materials such as pasta, gravy, porridge, chocolate, baby foods.
- Safe on most fabrics and all colours.
- Will make whites whiter and colours brighter.
- Will not cause yellowing or graying of fabrics with continued use.
- Dissolves rapidly.
- Economical.

PHYSICAL & CHEMICAL PROPERTIES:

- pH (1% solutions): 10.5
- Density: 1.0 gm/mL
